

Opera

The next generation is here

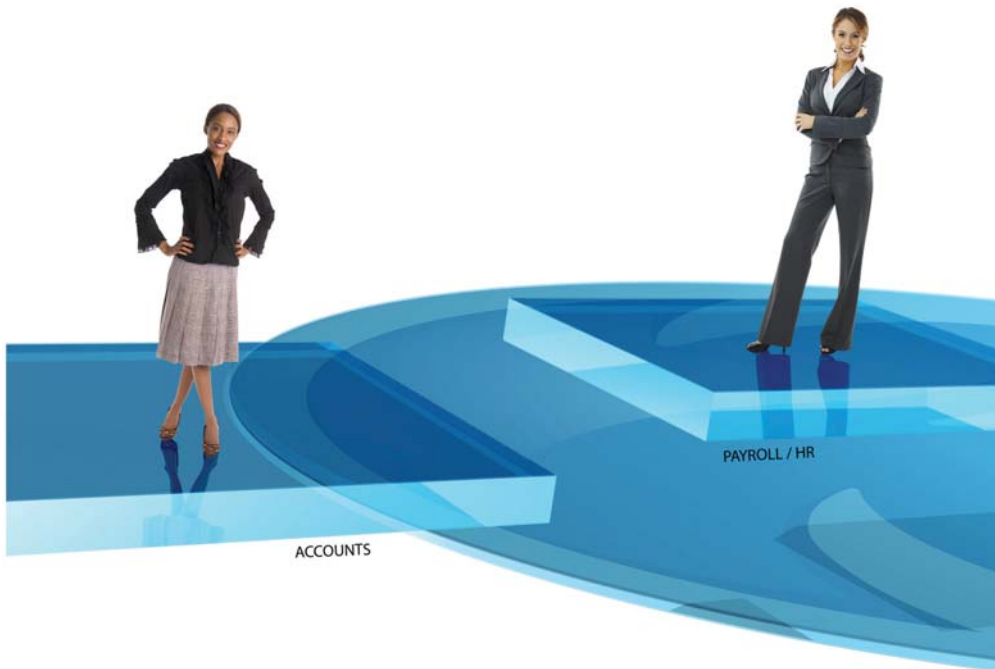

Make your work life easier with Opera 3

We've built on an award-winning solution to deliver Opera 3, which offers unbeatable benefits across your entire business and makes your work life easier.

As a Pegasus customer, you can improve your business insight for smarter decision making with better reporting and more flexibility. Stay compliant and submit your VAT 100 returns online to HMRC directly from Opera 3. With the open period accounting facility, you have the power to post transactions into any period of the last, current or next 3 financial years.

Open Period Accounting

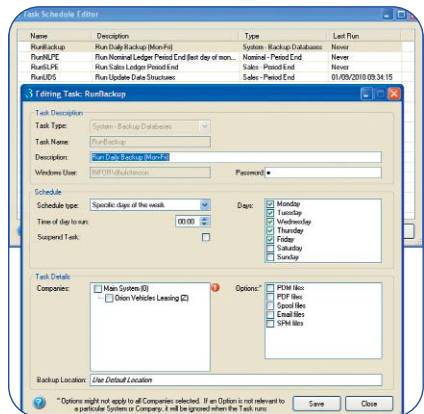

Nominal Ledger periods can all remain open in the previous, current and up to the next three financial years, so you can post transactions to any of those periods from any Opera 3 application that posts to the Nominal Ledger. In addition, Opera 3 now allows you to rectify mis-posted entries in the Nominal journals.

Improved user interface

You'll find navigating around Opera 3 easy with the improved user interface delivering a fresh, modern look and feel. We've introduced a new ribbon bar with meaningful icons to help make your work life easier. Plus, the restructured User Assistance can be accessed on all forms, so the information is at your fingertips, as and when you need it.

Scheduler

Run some of your Opera 3 tasks at a time that suits you: schedule tasks to process outside the normal working day, minimising disruption. There are numerous tasks you can schedule, including backing up your Opera 3 data, and running Period Ends in the Nominal, Purchase and Sales Ledgers.

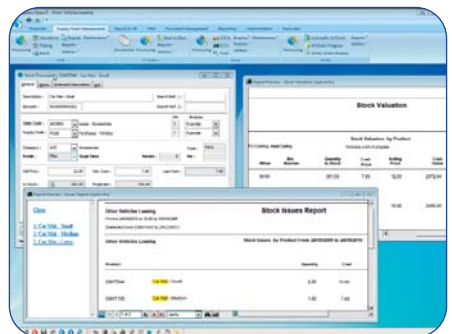

Improved Reporting

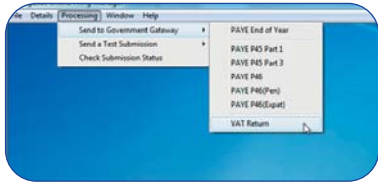

In Opera 3 you can run multiple reports at the same time. Reports can stay open while you navigate to other areas of the system. You can minimise one and open another or even tile reports on screen so you can compare them side by side. And the new search facility creates a list of bookmarks that link to the relevant results of your search.

Reports can now be output directly to MS Excel®, for further data manipulation. There are also additional charting controls built into Opera 3 reporting tools such as Views. They make the display of information much easier to interpret and enable colour modification, printing and copying to the clipboard, for pasting into MS Word® or Excel®.

VAT 100 online filing

HMRC is phasing out paper VAT Returns from 1 April 2010. Take the strain out of online filing and submit your VAT Return online quickly and easily direct from Opera 3. There's less room for error and you'll have peace of mind.

Opera 3 Info Centre

A brand new website designed just for you, the Opera 3 user. This is a resource centre for your Opera 3 solution, with everything you need to know at your fingertips. What's coming soon? Are there any special customer offers available? How can I work smarter? Find out with Opera 3 top tips.

Improved User Assistance

Opera 3 Help has been restructured and significantly enhanced. It now includes a What's New section and a How To section. Each form has a Help button that opens the Help topic relevant to that form. Most Help topics include a Related Topics Help button.

Enhanced security

With password expiry, the potential for abuse of compromised passwords is limited to a specific period of time. Opera 3 now removes the burden of identity management from employees and management, keeping sensitive corporate data safer.

More reasons to move to Opera 3

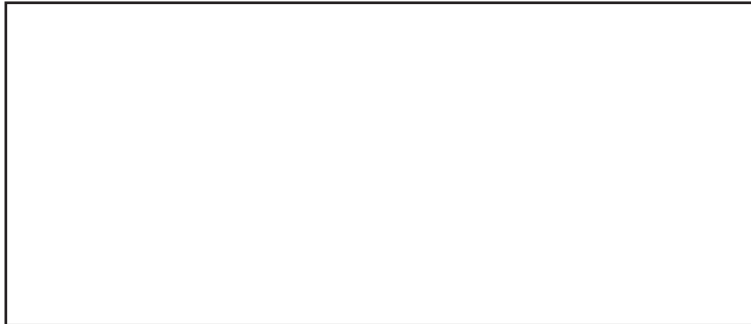

- Full integration with MS Office® 2010.
- Double-click processing, for quick access to your notes and documents.
- Mouse wheel navigation to speed up your record searching.
- Fresh new MS Office look and feel.
- New, meaningful icons for Processing, Report and Analysis Bar for fewer keystrokes, less searching and better displayed results.
- Brand new MS Office-style ribbon bar to make navigation around Opera 3 quick and easy.
- The order of tabs can be changed and the Favourites bar has been brought into the Opera 3 ribbon bar to improve access to the system.

Purchasing Opera 3

Enjoy great savings with our special pricing for Pegasus customers, available for a limited time.
